

Next generation semiconductor

Compared with silicon schottky, PANJIT's new silicon carbide (SiC) schottky delivers lower switching loss, higher breakdown voltage, and outstanding performance under high temperature condition (175 °C) due to its material characteristics. It is the optimal choice for customers who need high system efficiency, especially in the solar system, power management applications, and industrial fields.

Reverse Recovery Loss

Power Loss Comparison

Feature

- Low Tr_r
- High frequency operation
- Low EMI
- Good performance at high temperature operation

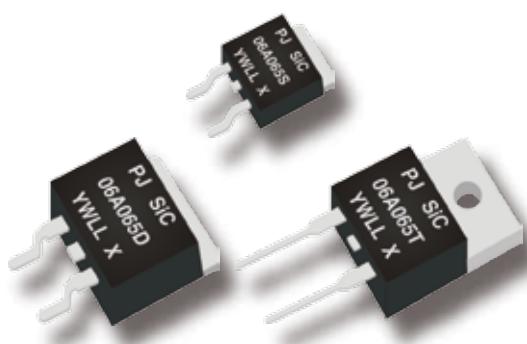

Application

- Industrial equipment
- EV charging
- IT power supplies
- Solar inverter
- LED

SiC Schottky
